Ethical Decision Making In Nursing And Healthcare The Symphonological Approach 3rd Edition Ethical Decision Making In Nursing Husted

Decision Making in Nursing enables students to be reflective, critical, flexible, and comfortable with the many decisions they will make as a nurse on a daily basis. This text offers models that nurses may integrate into practice and explores how decisions are affected by health policy, politics, ethics, legal issues, religion, culture and other influences. Each chapter includes a case study using a nursing scenario to illustrate the use of a particular framework in an actual practice setting.

Clinical decision-making is a fundamental part of professional nursing care and it is essential that students develop sound judgement and decision-making skills in order to deal confidently with the challenges they will encounter as registered nurses. This book enables pre-registration nursing students to understand, develop and apply these skills in order to practise safely and effectively. The book links theory to realistic student experiences and clinical scenarios to show how to use these skills in practice. Key features:

- Fully mapped to the new NMC standards of proficiency for registered nurses (2018)
- Contains clinical scenarios illustrating decision making in practice
- Activities challenge students and build confidence in their judgement and decision making skills.

Useful for nurses, physicians, and allied health professionals, this book provides a systematic approach to bioethical decision making that can help clarify issues in situations where “right” and “wrong” may not be clearly defined. It includes tips for educators, chapters on applications for administrators and researchers, and advanced directives.

Now in its Sixth Edition, this foremost leadership and management text incorporates application with theory and emphasizes critical thinking, problem solving, and decision making. More than 225 case studies and learning exercises promote critical thinking and interactive discussion. Case studies cover a variety of settings, including acute care, ambulatory care, long-term care, and community health. The book addresses timely issues such as leadership development, staffing, delegation, ethics and law, organizational, political, and personal power, management and technology, and more. Web links and learning exercises appear in each chapter. An Instructor's CD-ROM includes a testbank and PowerPoint slides.

Bioethical Decision Making in Nursing, Fifth Edition Springer Publishing Company

This is a unique, innovative professional nursing ethics textbook designed specifically for all practicing nurses and to meet the educational needs of all nursing students, including RN to BSN and RN to MSN students. Written by experts in the field, it discusses ethical concepts relevant to the registered nurse who has practiced for several years but is learning higher level concepts and applications. This text addresses different areas of professional practice and is rich with case studies illustrating the need for ethical competence and decision making. The book fulfills the necessary criteria for the AACN Essentials for Baccalaureate Education and the QSEN and IOM competencies. It also integrates relevant provisions and statements from the revised Code for Nurses (ANA, 2015).

Clear and concise, the text relates content to the nurse's current practice and introduces a framework for the development of ethical competence, from recognition of an ethical situation to implementation of a justifiable action. A decision-making model that includes elements of care and virtue ethics is also included. Essential communication and conflict skills are addressed, in addition to the role of the ethics committee and ethics consultation. The book discusses common ethical issues likely to be encountered, how to recognize and address moral distress, and ethical practice as it relates to research, quality, and safety. Case studies that incorporate evidence-informed research provide the opportunity to develop ethical skills and apply decision making principles. Relevant QSEN competencies and provisions and statements from the ANA's revised Code for Nurses (2015) are featured in each chapter. Interactive exercises and questions and PowerPoints provide further opportunity for critical thinking. This book has been about ethics and ethical decision making. As ethical reflexion permeates every decision made in practice, the book discussed the importance of developing moral reasoning ability, which is crucial for handling ethical dilemma and making ethical decisions in nursing and social work practice. The book encouraged the use of models as another form of ethical decision-making paradigms. The book used discussions based on case studies to illustrate how ethics inform practice and allow one to make decisions that are morally justifi able. "This book will enable our students to gain a step by step approach to the knowledge and application of Ethics to practice. The book drew from the work of many scholars and designed a simple model to help students gain the knowledge of ethical analysis and decision making". Vidal Johnson, Senior Lecturer in Law and Ethics, London South Bank University "I was impressed by the way this author consistently addressed both social work and nursing ethical issues, highlighting the importance of ethics and application in nursing and social work practice". Michelle Evans, Senior lecturer in Learning Disability/Mental Health and Social Work, London South Bank University "Most other published books on nursing and social work ethics are often laden with theories and principles. This book offers an excellent contribution to the understanding of the relationship between learning ethical theories and principles and their practice applications". Jude C. Ibe, Principal lecturer in Dept. of Family Care and Mental Health; University of Greenwich, London.

An invaluable resource for any athletic training curriculum, this text introduces athletic training as a profession by presenting an ethical framework of values, principles, and theory. Chapters explore important issues related to cultural competence, foundational behaviors of professional practice, professional and moral behavior, and ethical decision-making - skills that both inform and transcend the athletic training profession. Learning activities at the end of each section help you see connections between the material and clinical practice, revealing new insights about yourself, your profession, and the organizations with which you will
interact. Content draws connections between ethical values, principles, and theory, as relating to the Foundational Behaviors of Professional Practice. Over 100 case studies promote critical thinking with clinical examples of ethical situations and conflicts that correspond to the domains identified by the Board of Certification (BOC) Role Delineation Study. Learning Activities chapters at the end of each section provide over 60 activities designed to link content and theory to clinical practice. Organized into three levels, Level One consists of an introduction to professional ethics in athletic training, Level Two focuses on professional enculturation, and Level Three explores the application of ethical concepts in professional life. Good to Know boxes highlight information throughout the chapters to enrich content and identify applications in the field. Professional Pearl boxes contain quotes from NATA Hall of Fame Inductees, offering advice about the challenges often faced in the profession. Chapter outlines, learning objectives, and ethical concepts at the beginning of each chapter lay out the information in an easy-to-follow framework. Appendices include self-assessment and evaluation tools that encourage you to assess where your own responses fall within ethical boundaries. Sections on cultural competence and ethical dilemmas increase awareness of diversity by exploring scenarios in which the practitioner's and patient's morals may conflict.

Based on the concept that compassionate relationships between nurses and patients form a vital element of humanistic nursing, Nursing Ethics: Across the Curriculum and Into Practice provides foundational knowledge about ethics to prepare nursing students for the moral issues they will experience daily. Derived from theoretical foundations, clinical evidence and case study, this text is ideal for nursing students by providing decision-making approaches and models, rationale for decisions, and management of care for various topics. Addressing a wide array of nursing moral issues, this text includes current scholarly literature, related news briefs, and research and legal findings regarding ethical issues.

Dealing primarily with nursing in South Africa and the particular challenges that the country's nurses encounter, this book looks at the ethical questions confronting nurses as well as the moral philosophy behind those considerations. Ubuntu—the African notion that everyone in a community is responsible for the welfare of its members—plays a large part in the moral deliberations of the book, as do problems particular to South Africa. This second edition is updated with new case studies on the AIDS pandemic as well as new ethical questions stemming from the legalization of abortion in South Africa and the rise in the power of health worker unions.

This text reviews theoretical bases for bioethics including definitions of morals, ethics, metaethics, bioethics and the role of health care professionals. Theory includes discussion of philosophical ethical systems, such as utilitarianism, deontology and natural law, and moral theology and religion as source and reason for ethics. The natural law theory of moral development is described in terms of Jean Piaget, Lawrence Kohlberg, James Rest, Carol Gilligan and others. One way to understand this is to see people as moral beings. This includes nurses and other health care professionals who make ethical decisions.

The International Council of Nurses is an internationally recognised body that considers nursing issues in detail before putting forward best practice. This publication from the ICN draws upon everyday ethical dilemmas in nursing practice and responds to the realities of nursing and health care in a changing society. It includes the ICN's reviewed Guidelines for Nursing Research and promotes international standards for individual nurses, regulatory bodies and National Boards. This new edition provides the background theory necessary to understand ethical decision making, focusing on the individual nurse's responsibilities - promoting health, preventing illness, restoring health and alleviating suffering - and looking at the wider issues in relation to patients, colleagues and society as a whole.

This unique text uses hands-on examples and learning exercises to help you apply critical ethical principles to specific nursing challenges while addressing a range of patient populations and settings.

With the recent new and radical developments in the health care field that have been introduced at a breathless pace, nurse administrators must work to stay informed of the developments that affect their nursing departments both directly and indirectly. The Nursing Administration Handbook has a long track record, both as a textbook and as a hands-on tool for nurse executives seeking insight and step-by-step guidance in all aspects of administration. The fourth edition of this text surveys the entire field of nursing administration and incorporates the most significant new developments and current practices.

Every day nurses are required to make ethical decisions in the course of caring for their patients. Ethics in Nursing Practice provides the background necessary to understand ethical decision making and its implications for patient care. The authors focus on the individual nurse's responsibilities, as well as considering the wider issues affecting patients, colleagues and society as a whole. This third edition is fully updated, and takes into account recent changes in ICN position statements, WHO documents, as well as addressing current issues in healthcare, such as providing for the health and care needs of refugees and asylum seekers, bioethics and the enforcement of nursing codes. This publication from the International Council of Nurses is the essential resource for nurses seeking to understand ethical decision making, written by world experts in nursing ethics.
